Section 14. General

14.1. In the reporting period 2018-2019, what have been the main difficulties that your country has encountered in implementing the IUU Regulation, including the catch certification scheme?

There are many different designs of the CC's and the knowledge of the importers is sometimes fragmentary.

14.2. Which improvements would your country suggest to the Regulation that would make implementation smoother?

- The implementation of the IT Catch System would be very helpful, because fewer requests would be necessary.
- In some difficult and recurring cases (see section 7.3, request to **Russia**) it would be crucial that the European Commission takes some responsibility for communication with third countries.

Russia did not answer to specific questions, but only confirmed the overall validity of the catch certificate. It is very unsatisfactory and time consuming that we as SLO then have to find out what other Member States had done in similar cases in the past. The result can only be that the approaches and results/actions are not congruent.

In our view, the response of the European Commission to us was not helpful. For said reasons, the outcome - seen from the perspective of the European Union as a whole – is everything but effective, if in those cases, the European Commission does not get into action, and just shifts responsibility onto Member States.

This weakens the whole system of IUU-control.
